COLMAR'S READY FOR OLD MAN WINTER, ARE YOU?

LIQUID HEAT:

Liquid Heat is a belt deicer that was formulated over 20 years ago to address the problems associated with operating a conveyor belt system in freezing weather conditions. Ice prevention is the key to maintaining your operation and thus your capacity numbers all winter long.

Liquid Heat is perfect for: belts, rollers, pulleys, docks or any other areas essential to your operation during freezing weather.

SNOW PLOW BLADE:

A seasonal item, but almost indispensable when snow piles up. These blades are long lasting. They are made of resilient rubber compounds and will outlast steel blades. The most popular size 1 ½" x 8" is always in stock here at Colmar.

SALT & SAND SPREADERS:

Our Argonics Polyurethane Salt & Sand Spreader, with its straight fins, fits most truck equipment on the market.

Advantages over steel include:

- 1 Abrasion resistance is many times better than steel*
- 2 Light weight which is easier for maintenance to handle and requires less horsepower to turn.*
- 3 Corrosion resistance to salt & sand will not cause rust problems*
- 4 Non-stick surface prevents build-up of frozen sand, which causes improper spreading.*

We Have What You Need...

When You Need It!
